Seasonality & model-year pricing

05 **Geographic Analysis**
Regional revenue concentration

06 **Key Insights**
What the numbers reveal

07 **Recommendations**
Where to act next

0 1 · BUSINESS CONTEXT

A national dealership at an inflection point

Bright Motors processes 90,000+ vehicle transactions across 40+ U.S. states. Leadership needs an evidence-based view of what is working — and where to invest next — to grow revenue, optimise inventory, and scale the dealer network.

01

Improve Sales Performance

Identify which makes, models and segments deliver the strongest top-line and pricing power.

02

Optimise Inventory

Align stock with the body styles, vintages and mileage bands that customers actually buy.

03

Expand Dealer Network

Quantify regional concentration and surface where geographic expansion makes sense.

Headline numbers at a glance

TOTAL REVENUE	AVG SELLING PRICE	TOP STATE SHARE	PEAK MONTH UPLIFT
$91.0M	**$16.8K**	**31%**	**+80%**
across 90,000+ vehicles	weighted across body types	California revenue concentration	July vs January revenue

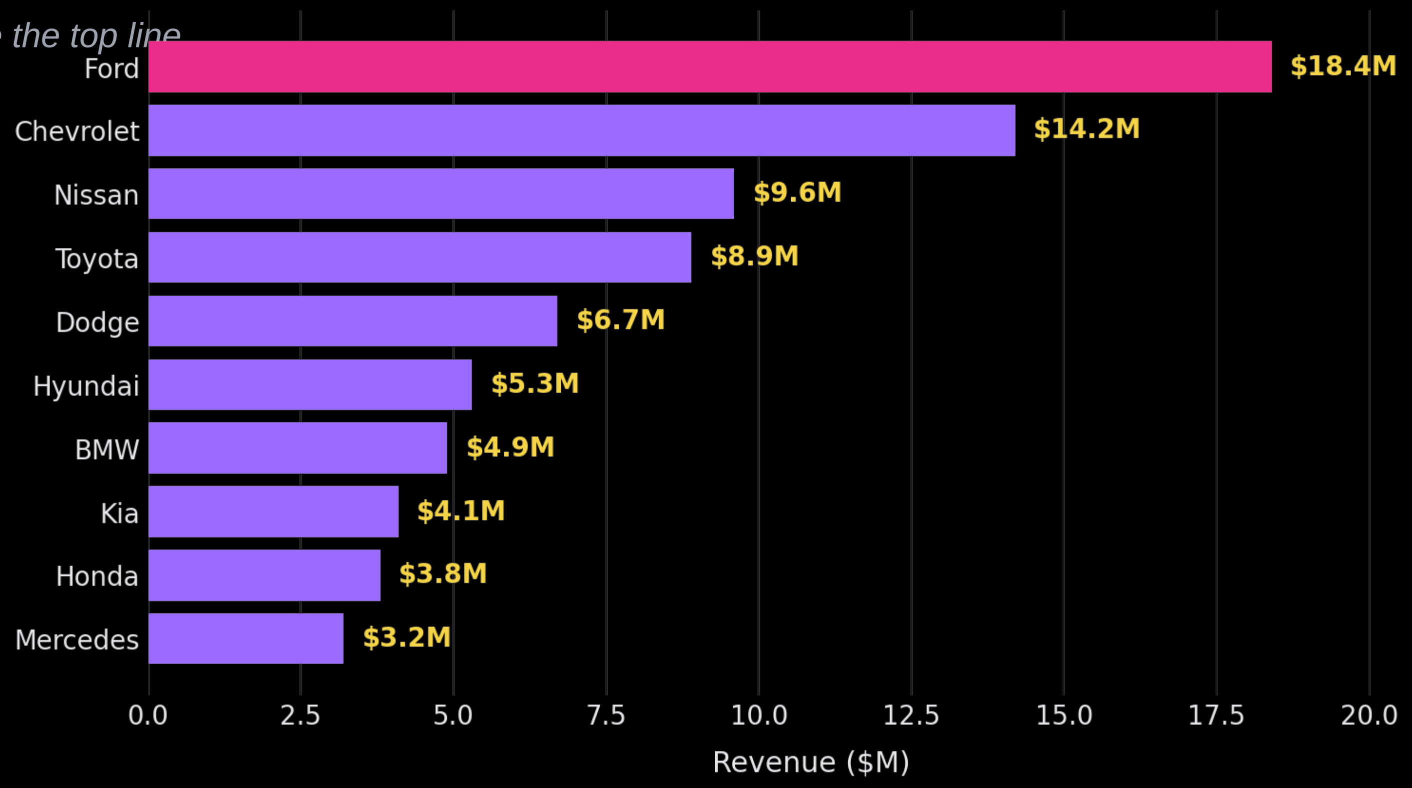
THE GROWTH STORY

California drives 31% of revenue — and July outsells January by 80%.

Closing the geographic gap by expanding into adjacent under-served states and smoothing the summer demand spike with always-on Q1 finance offers unlocks meaningful, repeatable revenue without changing the product mix.

Top revenue-generating brands

Which marques drive the top line



LEADER

Ford

$18.4M · 12.1% margin

TOP-3 SHARE

46%

Ford + Chevrolet + Nissan

CONCENTRATION

Ford & Chevrolet alone deliver 36% of revenue — heavy reliance on two American mass-market brands.

PREMIUM MARGIN

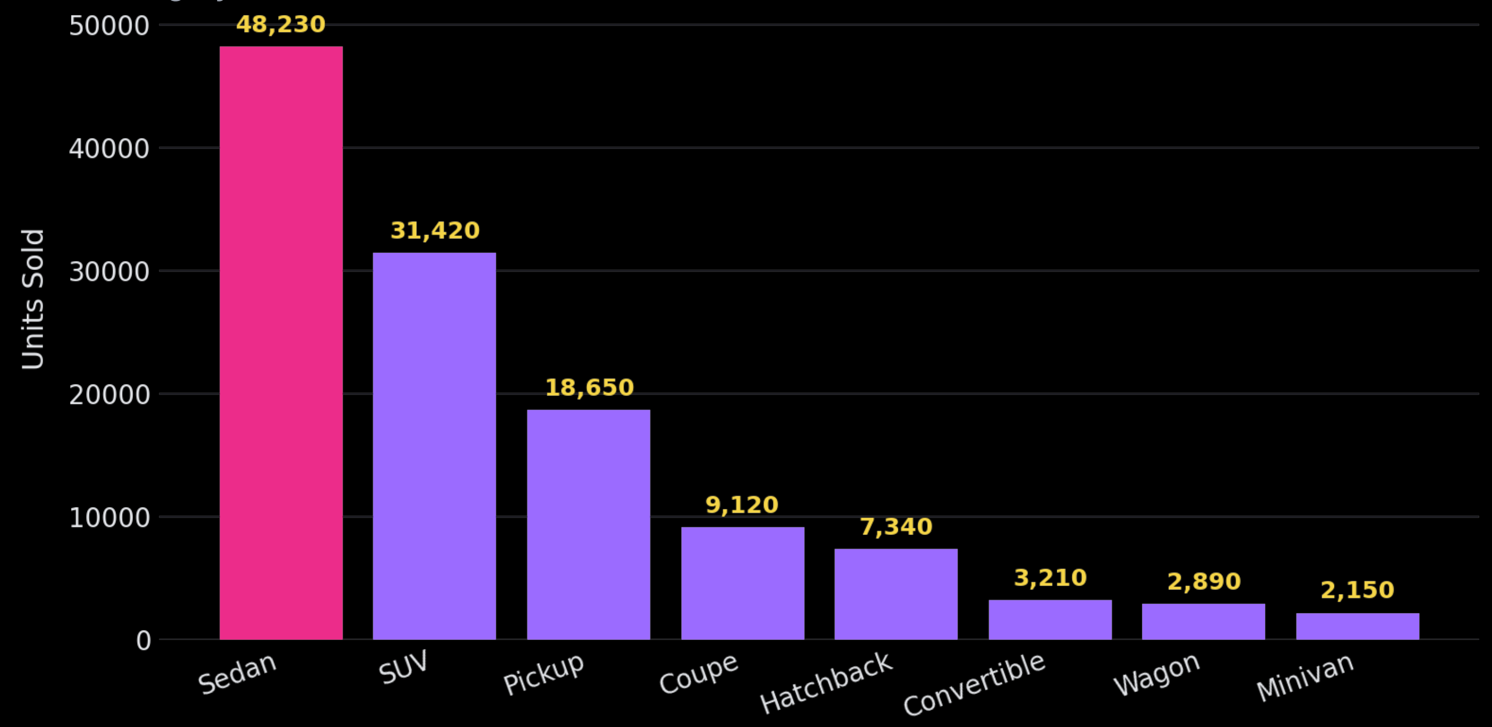
Mercedes & BMW post the highest margins (16.4% & 15.8%) despite lower revenue — premium pricing power is real.

ACTION

Lock supply contracts with Ford, Chevrolet & Nissan; grow premium German floor space to lift blended margin.

Body type performance

Total units sold per vehicle category.



TOP CATEGORY

Sedan

48,230 units

avg $14,250

SEDAN SHARE

39%

of all units sold

VOLUME WINNER

Sedans + SUVs drive 65% of unit volume — mainstream daily-driver demand dominates.

PREMIUM UPSELL

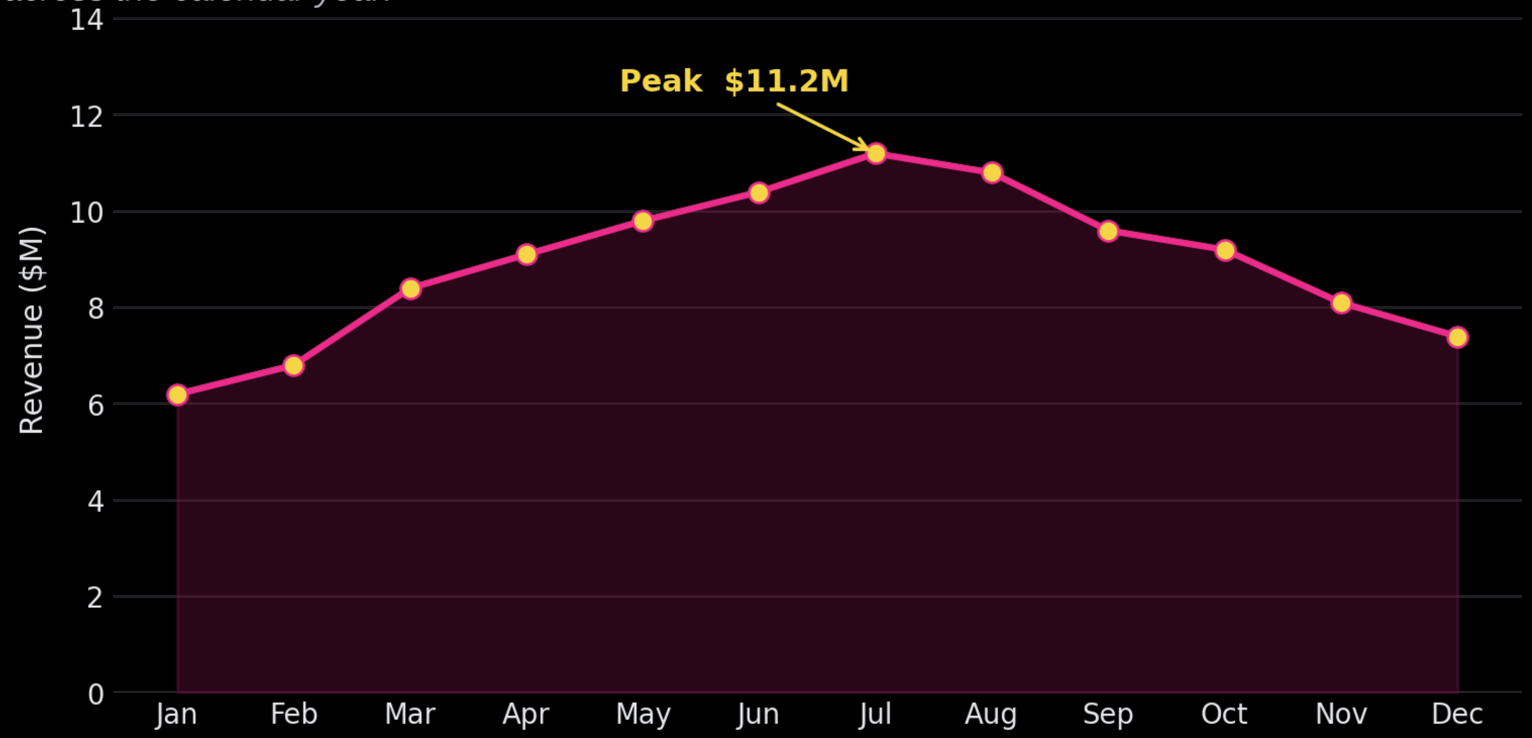
Convertibles command $28.6K avg — 2× the Sedan price and the highest ticket in the lineup.

ACTION

Tilt floor mix to 40% Sedan / 26% SUV / 15% Pickup; reserve a small premium pad for Convertibles.

Monthly revenue trend

Revenue trajectory across the calendar year.



PEAK MONTH

July

$11.2M · 760 units

JAN → JUL LIFT

+80%

Summer demand spike

SUMMER PEAK

Sales climb steadily Jan–Jul, peaking at $11.2M in July — clear summer-buying behaviour.

WINTER DIP

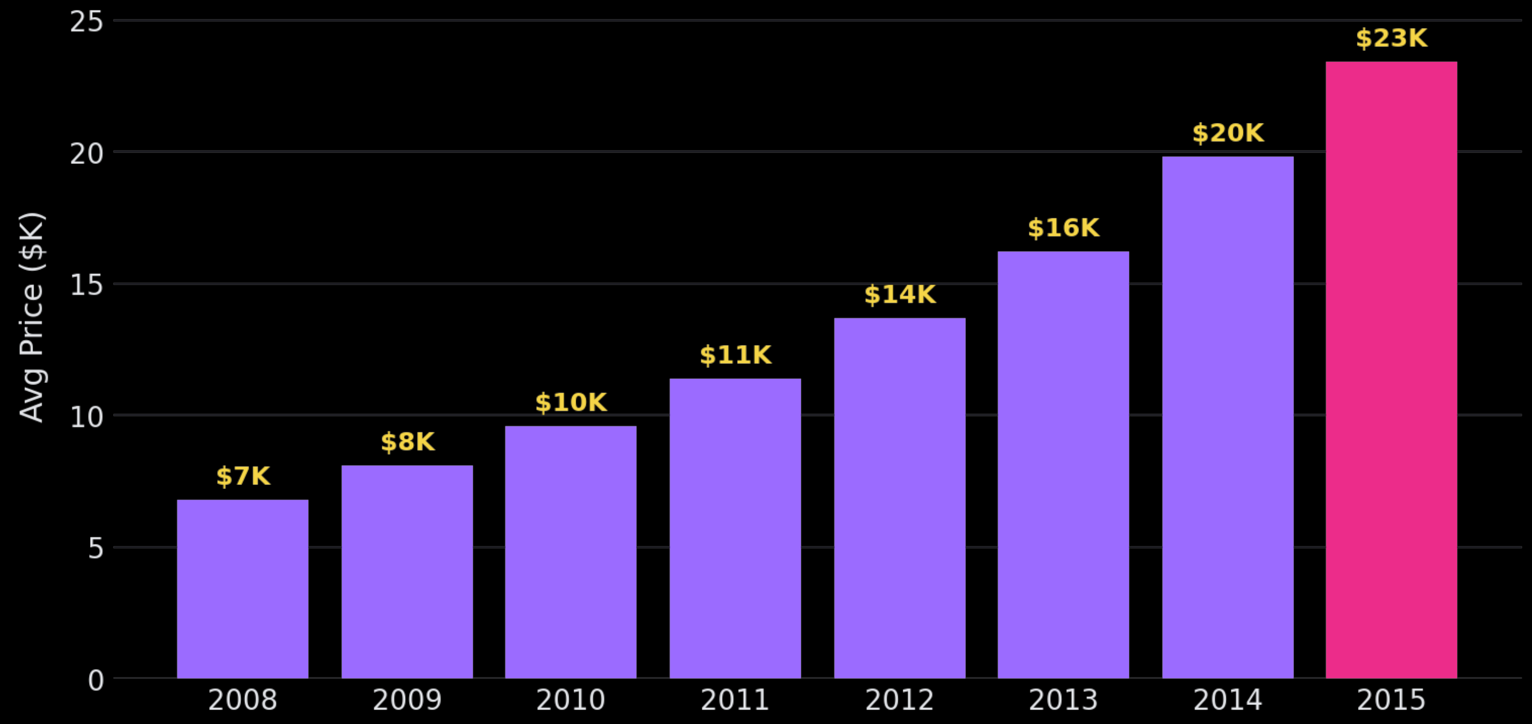
Dec dips to $7.4M (-34% vs peak). Cold-month demand softens across all body types.

ACTION

Pre-stock inventory & boost staffing in May–Jul; run Q1 finance promos to lift the winter trough.

Pricing by model year

Average selling price across vintages 2008 – 2015.



NEWEST VINTAGE

2015

$23.4K avg

PRICE LIFT / YEAR

+$2.4K

Linear vintage premium

VINTAGE PREMIUM

Each newer model year adds ~$2.4K to avg selling price — a remarkably linear price ladder.

3× MARGIN GAP

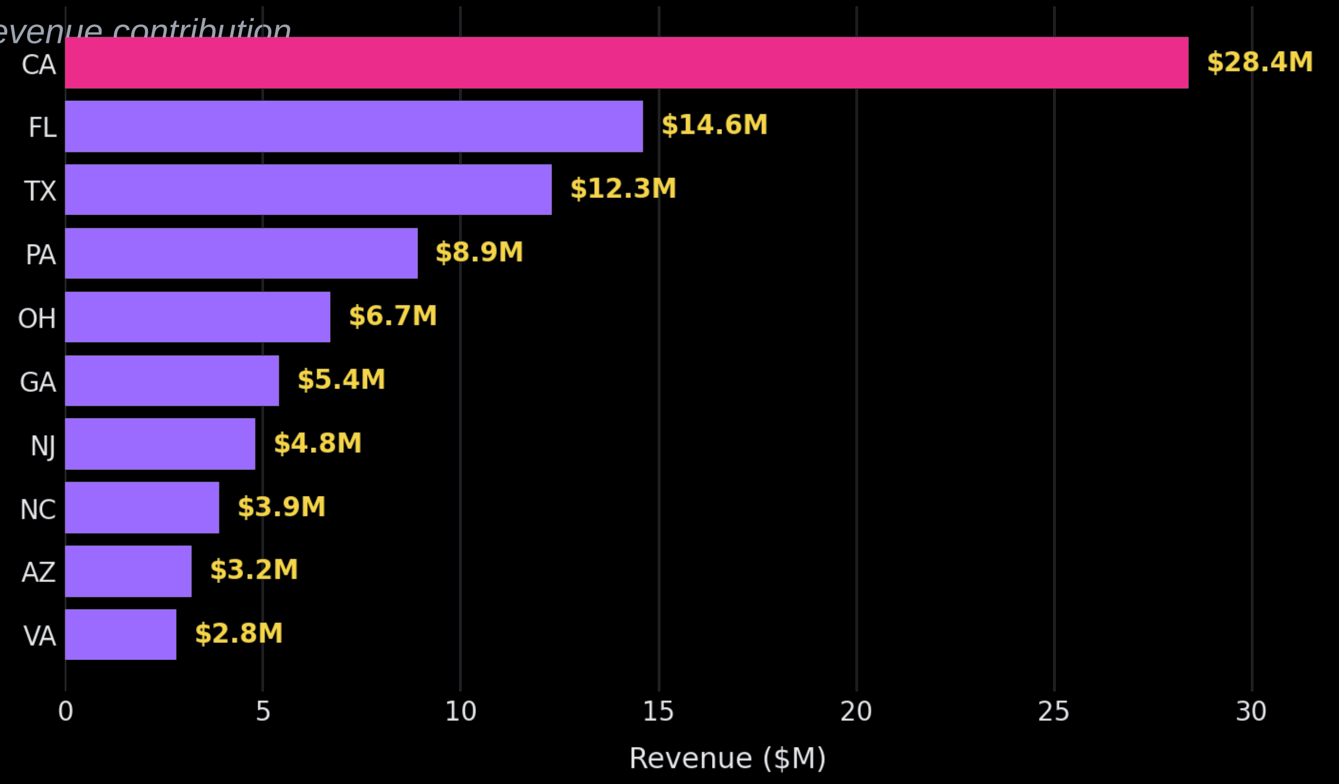
2015 stock sells for 3.4× the price of 2008 stock ($23.4K vs $6.8K) — newer = far more margin.

ACTION

Bias acquisitions toward 2013+ vintages; clear aged 2008-2010 inventory through bundled promotions.

Geographic revenue distribution

Top 10 states by total revenue contribution



TOP STATE

California

$28.4M · 31.2%

TOP-3 SHARE

61%

CA + FL + TX combined

OVER-INDEXED

California alone drives 31% of revenue — the business is geographically concentrated and exposed.

SUNBELT TILT

FL + TX add another 30% — warm-weather, large-population states dominate the top of the list.

ACTION

Pilot dealer expansion into adjacent under-served states (NV, OR, NC) to reduce CA dependency.

What the numbers reveal

01
Brand portfolio leans American

Ford & Chevrolet deliver 36% of revenue. Heavy reliance on two mass-market brands creates supply risk.

02
Customers buy practical bodies

Sedans (39%) + SUVs (25%) capture 64% of all units — clear preference for daily-driver formats.

03
Demand has a clear summer peak

Revenue climbs +80% from Jan to Jul, peaks at $11.2M, then tapers through winter to $7.4M.

04
Vintage drives the price ladder

Each newer model year adds ~$2.4K. 2015 stock fetches 3.4× the price of 2008 stock.

05
Premium brands punch above weight

Mercedes (16.4%) & BMW (15.8%) post the highest margins despite mid-pack revenue rank.

06
Revenue is geographically concentrated

California alone drives 31% of revenue. Top-3 states (CA, FL, TX) together capture 61%.

Five strategic plays for the Head of Sales

01
BRAND LEVER

Lock-in supply for top brands

Secure floor stock contracts with Ford, Chevrolet & Nissan. They drive 46% of revenue — stock-outs would be catastrophic.

02
INVENTORY LEVER

Tilt mix to Sedans + SUVs

Floor split: 40% Sedan / 26% SUV / 15% Pickup / 19% other. Aligns with proven 64% mainstream-body demand.

03
DEMAND LEVER

Smooth the seasonal curve

Pre-stock inventory and lift staffing for May–July peak. Run Q1 finance promos to lift the Dec–Feb trough.

04
MARGIN LEVER

Source low-mileage 2013+ stock

Bias acquisitions toward 2013+ vintages — each newer year adds ~$2.4K to avg price and protects margin per unit.

05
EXPANSION LEVER

Pilot beyond California

California is 31% of revenue — over-indexed. Pilot dealer expansion into adjacent under-served Sunbelt states.

THANK YOU

Data-driven decisions for smarter sales growth.
